

Safe Secure Educational Internet

Mobicip Enterprise – Fully Managed CIPA Compliant Internet Filter

Mobicip offers the first fully managed Enterprise Internet filter designed to work with a plethora of popular mobile computing devices used by children in the school and at home. Whether you need to protect a handful of devices for a pilot or a school or district-wide 1:1 implementation, ensure CIPA compliance for a fraction of the cost of traditional solutions.

Unparalleled Protection

Powerful intelligent real-time content analysis engine for effective and reliable filtering,

- Daily updates to cloud-based category database.
- Enforced Safe Search
- Blocks proxies and anonymizers
- Configurable filtering levels and settings

Features

- Fully managed and hosted on cloud computing infrastructure
- Robust Filtering with Dynamic Categorization
- Designed for Mobile and Thin-client Devices
- Easy Web-based Monitoring and Control
- Protect Any Number of Devices

Performance, Reliability & Scalability

Cloud computing can be loosely defined as using scalable computing resources provided as a service from outside your environment on a pay-per-use basis. You use only what you need and pay for only what you use. You can access any of the resources that live in the "cloud" at any time and from anywhere across the Internet. Whether you need filtering for one device, or a classroom, school or district, you can count on Mobicip without worrying about the hardware or network.

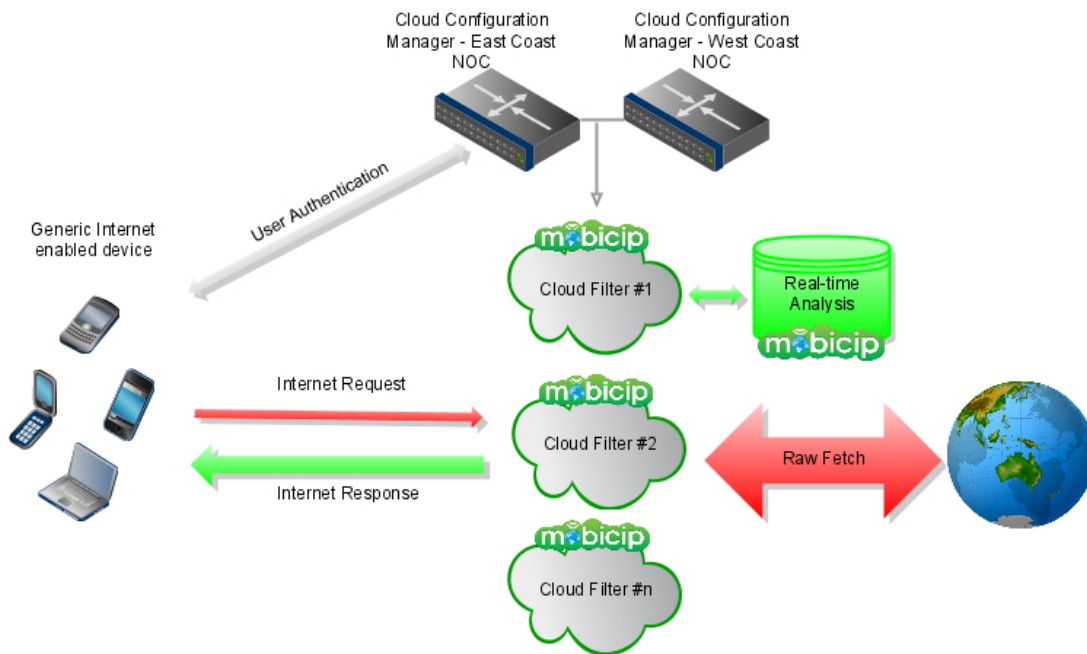

Mobicip's solution is provided on advanced scalable architectures delivered on the most reliable, proven cloud environments like Amazon Web Services (AWS), Go Grid, and RackSpace Cloud. The service was designed to be highly reliable, and has maintained 100% uptime since launch.

Mobicip's filtering is always on and protects the user anytime, anywhere – in school, at home or outside. The powerful cloud-based filtering performs intelligent real-time content analysis to determine appropriateness of web access, and provides easy, flexible web-based configuration and monitoring.

Intelligent Real-time Filtering

Mobicip’s powerful filtering engine categorizes websites into 75 different categories, access to which can be customized. The filter analyzes traffic dynamically in real-time using a variety of heuristic methods to prevent access to inappropriate content. Effective filtering, combined with the monitoring interface, enables parents and school administrators to ensure that children have a safe, secure and educational Internet experience.

About Mobicip.com

Mobicip is a pioneering provider of cloud-based parental control and content filtering for the consumer, enterprise, OEM and mobile carrier market. Mobicip is the most popular content filtering and parental control solution available on the iPhone App Store. The best-selling Mobicip Safe Browser app has been consistently rated among top paid apps, downloaded and used by tens of thousands of users, and protects users seamlessly across WiFi, 3G and EDGE networks. Testimonials, press coverage, and other relevant information can be found at <http://www.mobicip.com>. In addition to the iPhone, Mobicip plans to launch its service on netbooks, smartphones, gaming consoles and other Internet-enabled devices.
